

A**B**

Figure S8. Transcription of a part of the bradyzoite and sporozoite-specific genes is affected after AP2XII-1 knockdown. (A) Overlap between up-regulated genes in AP2XII-1-mAID KD parasites and 331 genes exclusively expressed in bradyzoites. (B) Overlap between upregulated genes in AP2XII-1-mAID KD parasites and 295 genes exclusively expressed in sporozoites.
