

## Supporting information

**Table S1.** Four HHV for broom, gorse and the respective biochars. Means with the same letter are not significantly different ( $p>0.05$ ) using Duncan test for broom and gorse independently (lowercase letter). The capital letters represents the difference between the HHV calculated for each sample.

	HHV <sub>1</sub>		HHV <sub>2</sub>		HHV <sub>3</sub>		HHV <sub>4</sub>	
<b>BROOM</b>	16.15±0.07a	<b>B</b>	14.89±0.44a	<b>A</b>	16.81±0.26a	<b>C</b>	14.42±0.31a	<b>A</b>
