

# Supplementary Materials: Stability-Indicating UPLC-PDA-QDa Methodology for Carvedilol and Felodipine in Fixed-Dose Combinations Using AQB<sub>D</sub> Principles

Jesús Alberto Afonso Urich, Viktoria Marko, Katharina Boehm, Raymar Andreina Lara Garcia, Anna Fedorko, Sharareh Salar-Behzadi and Dalibor Jeremic.

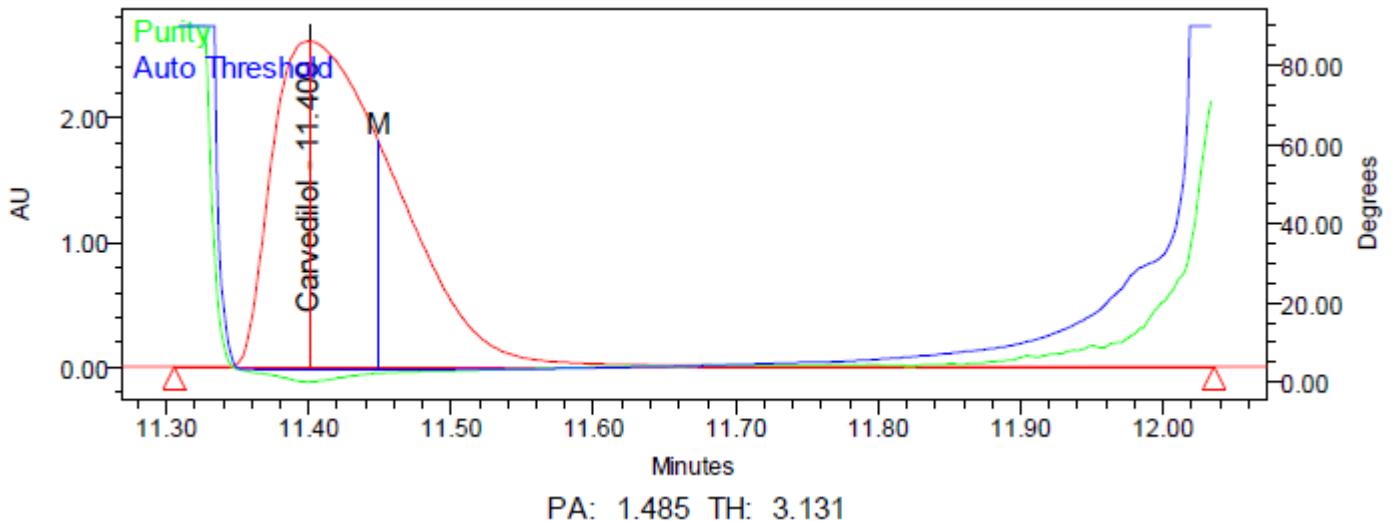

Figure S1. Purity plot of Carvedilol on forced degradation (control)

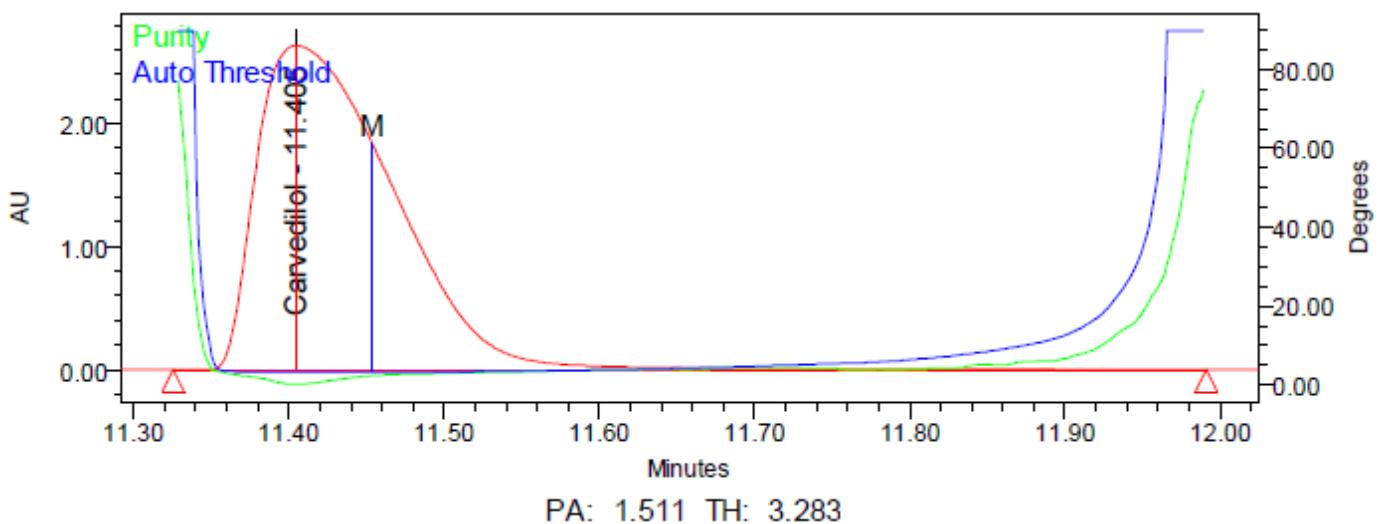

Figure S2. Purity plot of Carvedilol on forced degradation (acid)

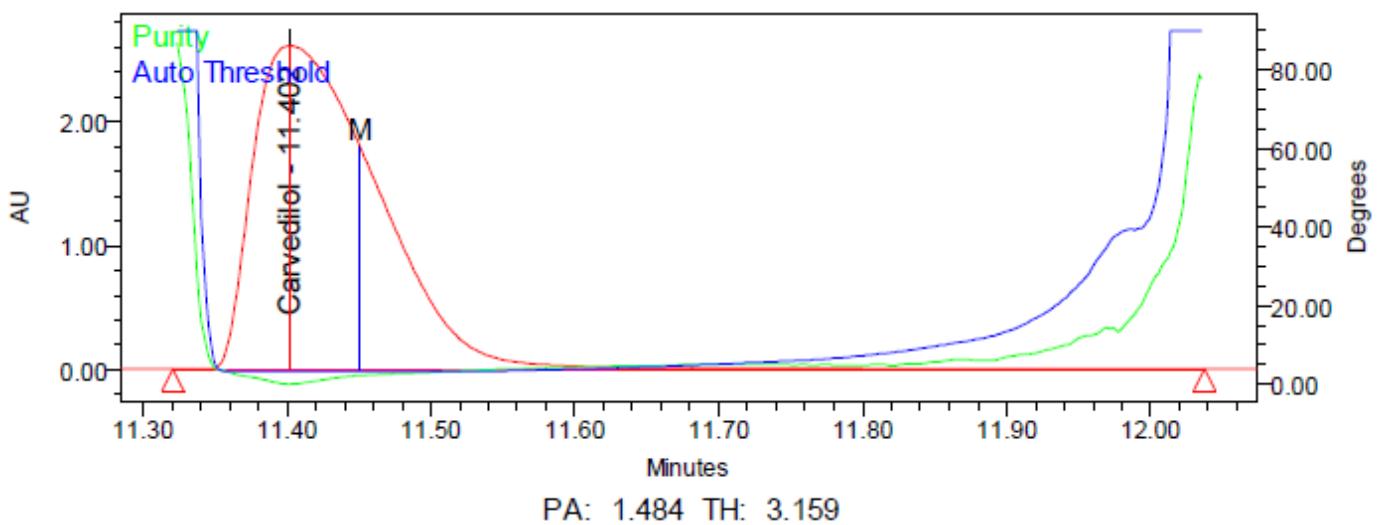

Figure S3. Purity plot of Carvedilol on forced degradation (basic)

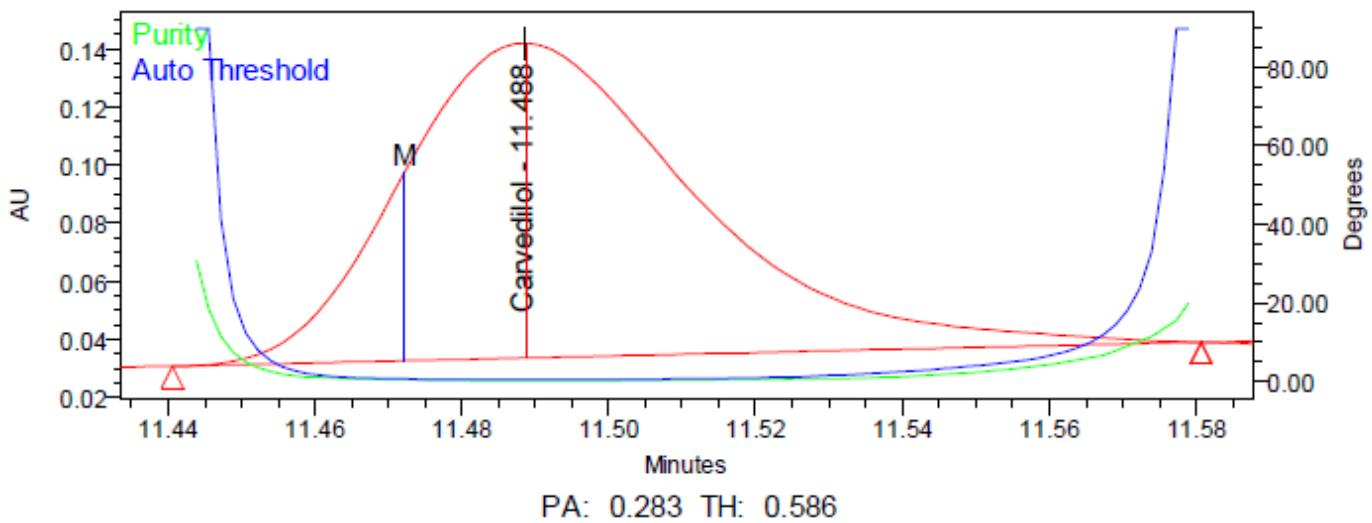

Figure S4. Purity plot of Carvedilol on forced degradation (oxidative)

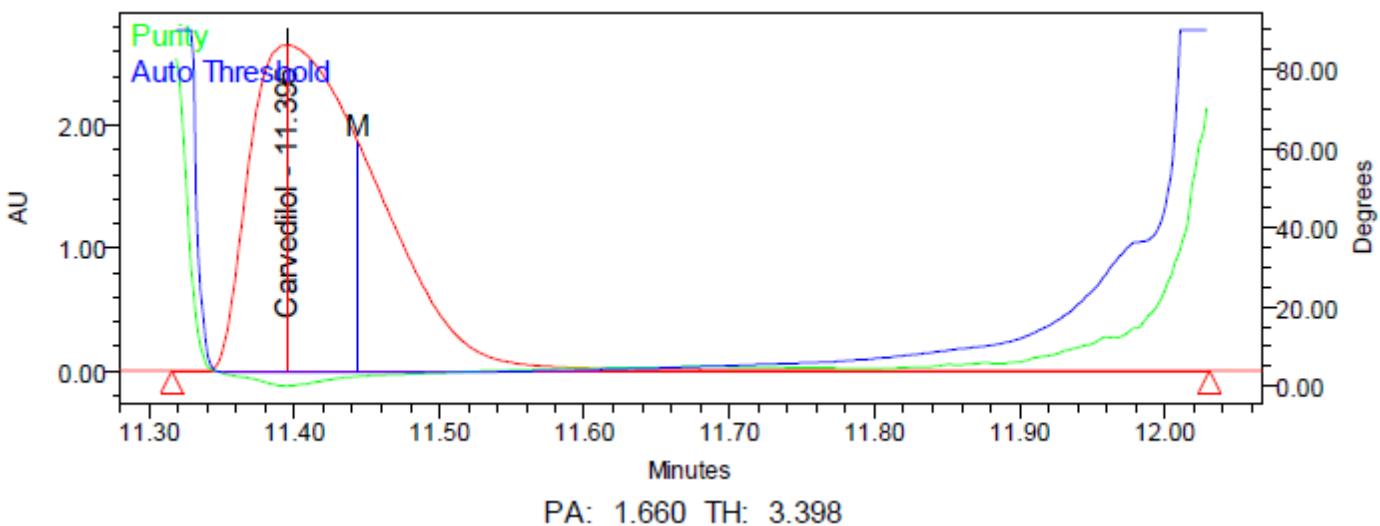

Figure S5. Purity plot of Carvedilol on forced degradation (thermal)

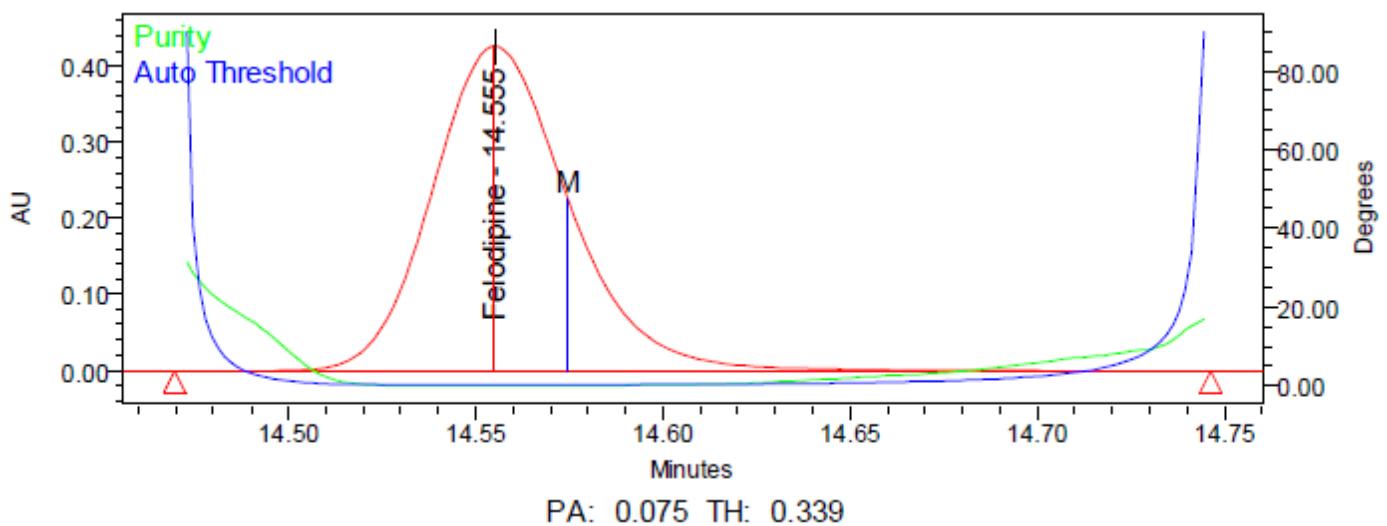

Figure S6. Purity plot of Felodipine on forced degradation (control)

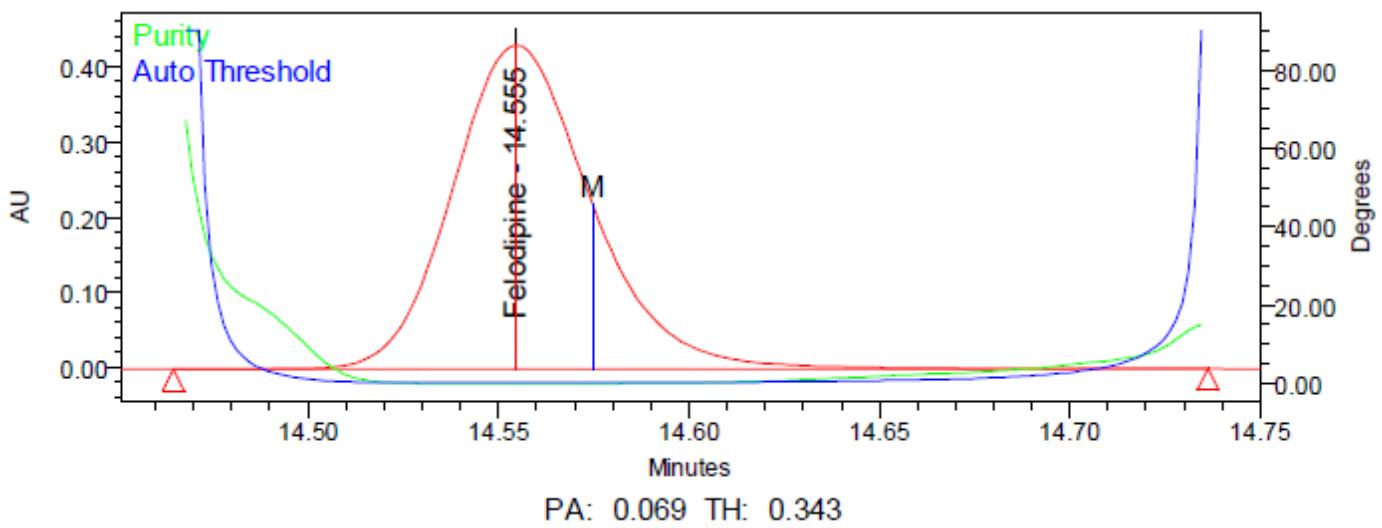

Figure S7. Purity plot of Felodipine on forced degradation (acid)

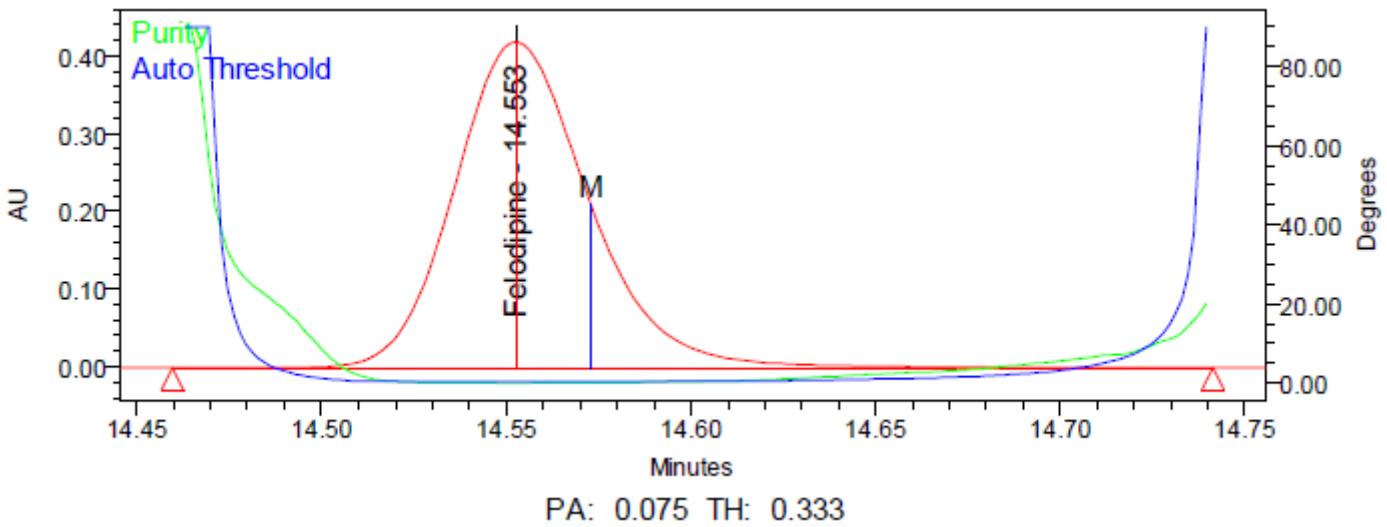

Figure S8. Purity plot of Felodipine on forced degradation (basic)

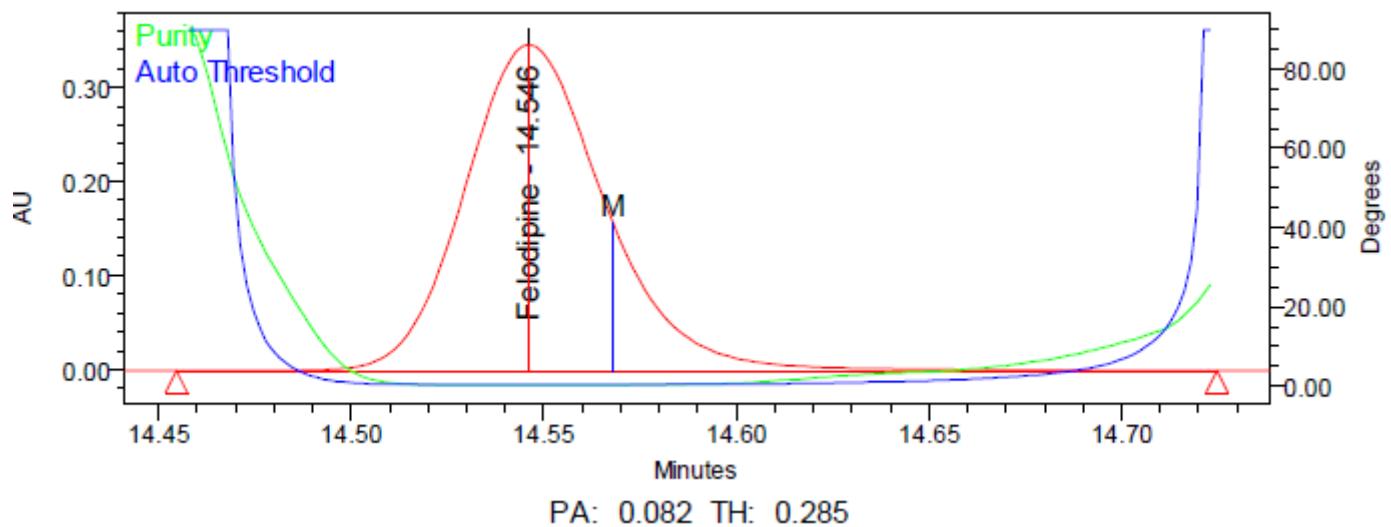

Figure S9. Purity plot of Felodipine on forced degradation (oxidative)

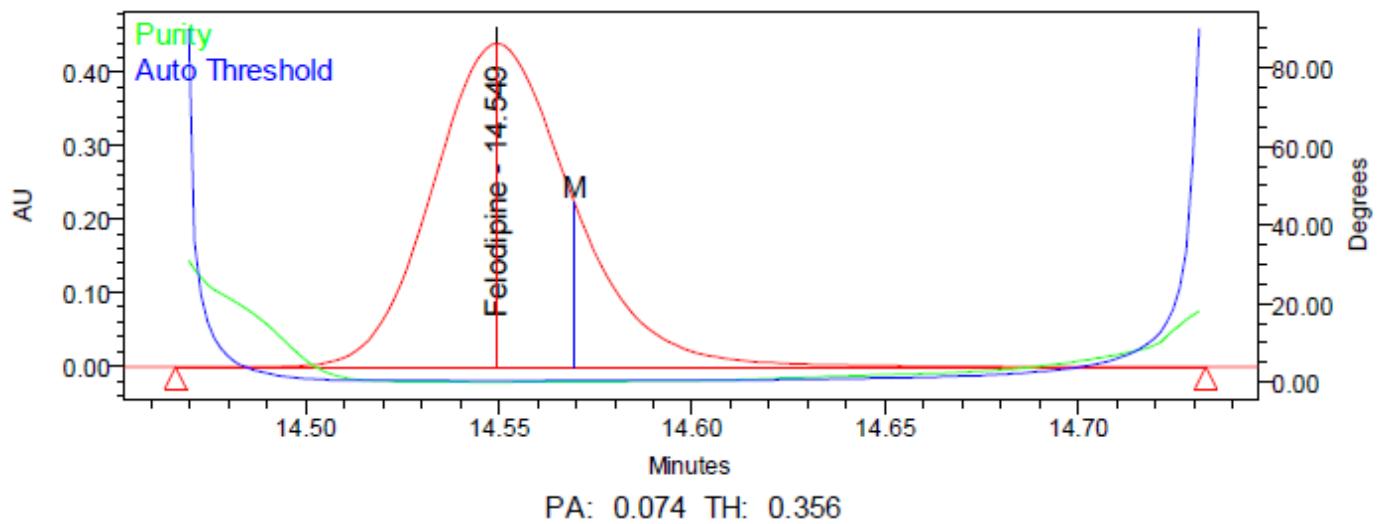

Figure S10. Purity plot of Felodipine on forced degradation (thermal)

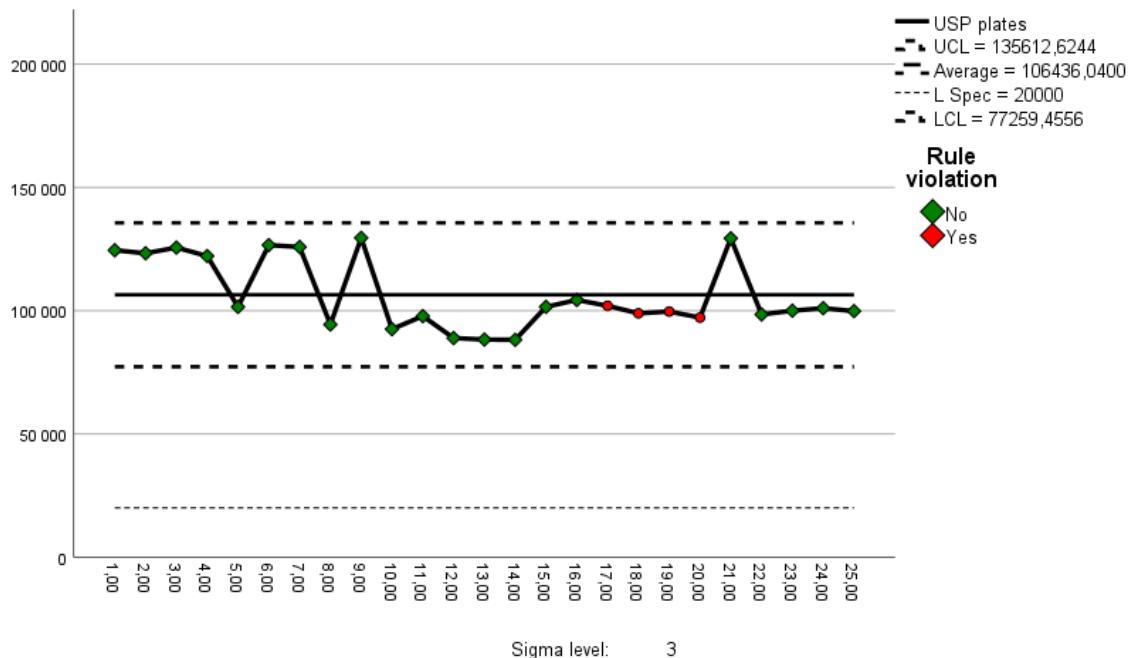

Figure S11 CAV USP plate: X-mR control chart - individual values at sigma level of 3

(Points 17,18,19 and 20: 8 consecutive points below the center line. Cpk: 2,98 (90%CI 2,16-3,80); PpK: 2,02 (90%CI 1,53-2,51))

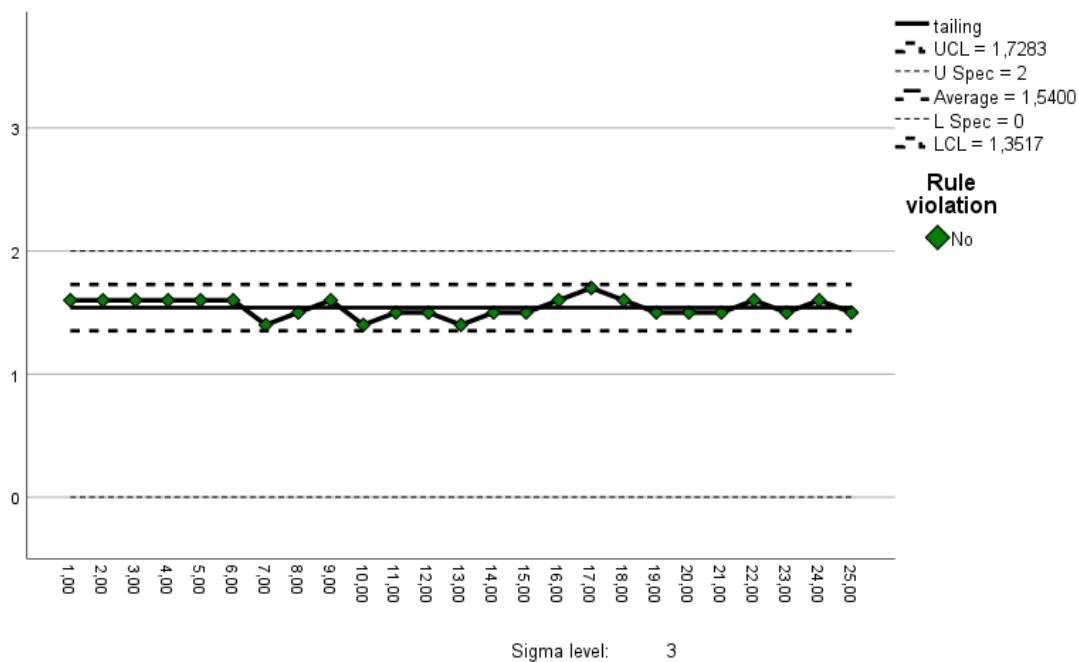

Figure S12 CAV tailing: X-mR control chart - individual values at sigma level of 3.no rules were violated. Cpk: 2,97 (90%CI 2,15-3,79); PpK: 2,01 (90%CI 1,52-2,50)

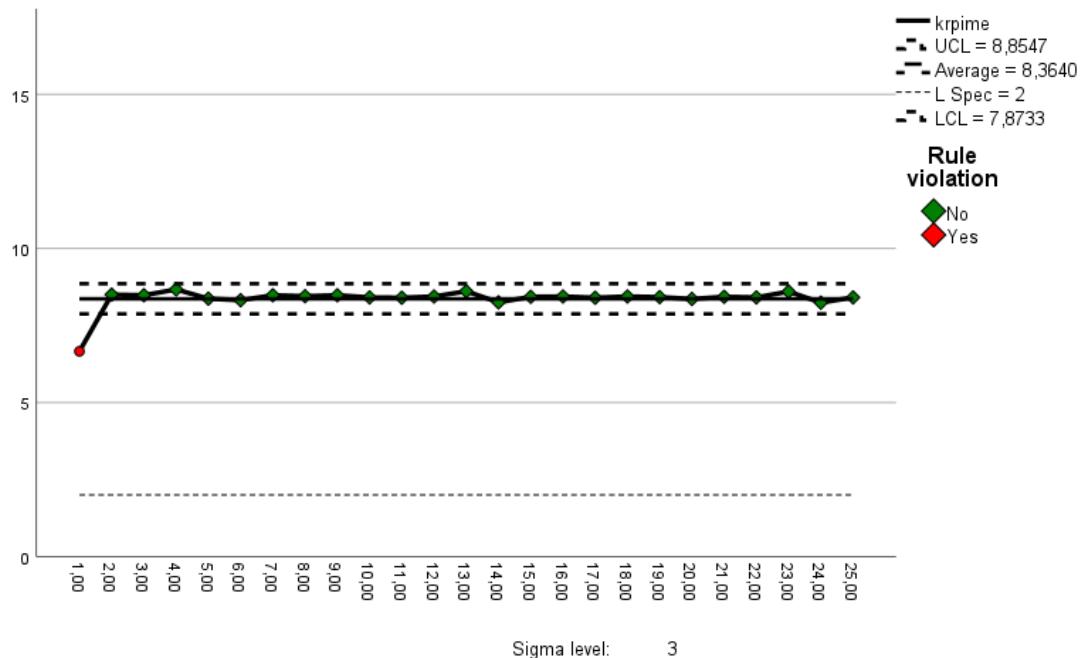

Figure S13 CAV capacity factor: X-mR control chart - individual values at sigma level of 3

(Point 1: less than -3 sigma. Cpk: 8.31 (90%CI 6.06-10.59); PpK: 5.77 (90%CI 4.39-7.14))

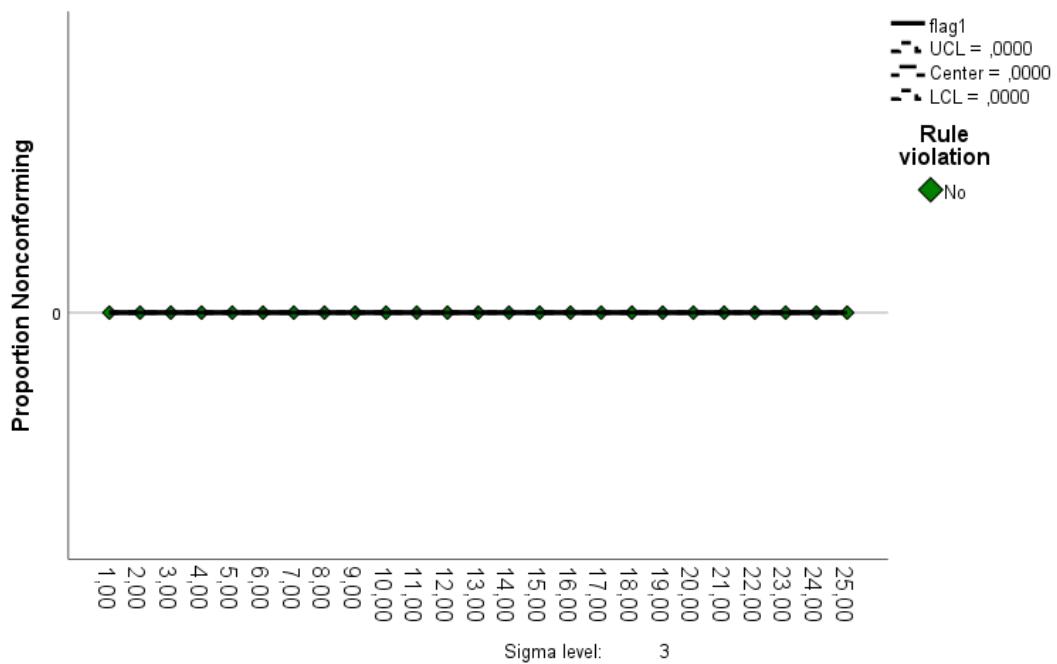

Figure S14 CAV flag: SPchart - at sigma level of 3

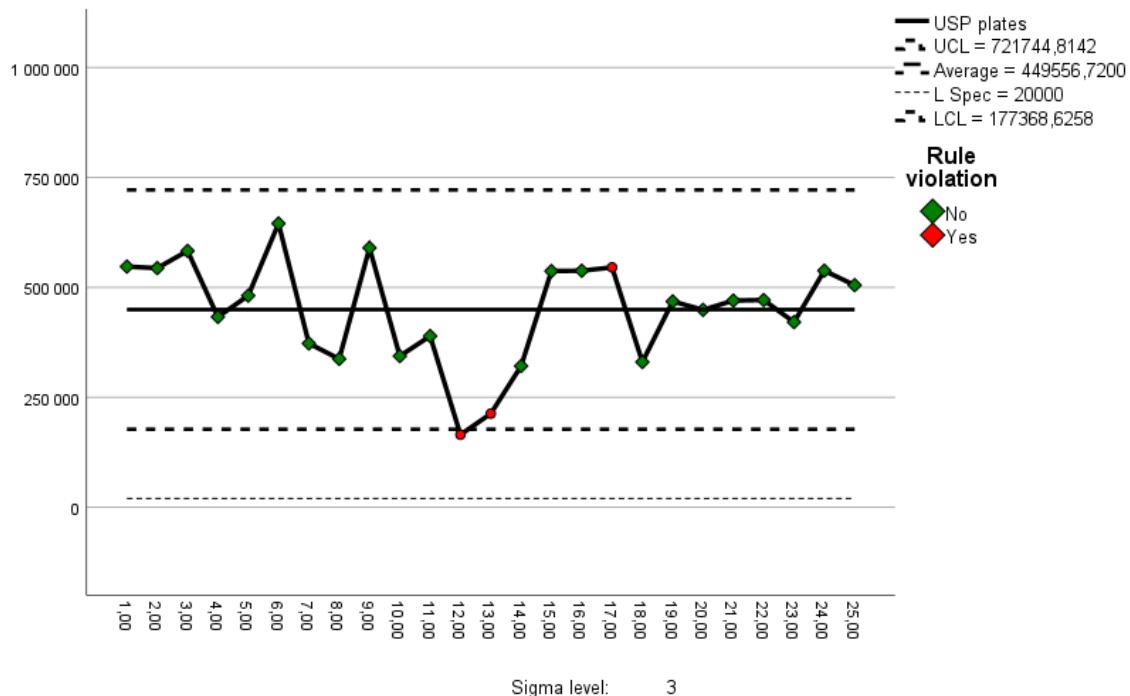

Figure S15 FLP USP plate: X-mR control chart - individual values at sigma level of 3

(Point 12: less than -3 sigma; Point 13: 2 points out of the last 3 below -2sigma; Point 17: 6 points in a row trending up; Cpk: 1,43 (90%CI 1,02-1,84); PpK: 1,21 (90%CI 0,91-1,52))

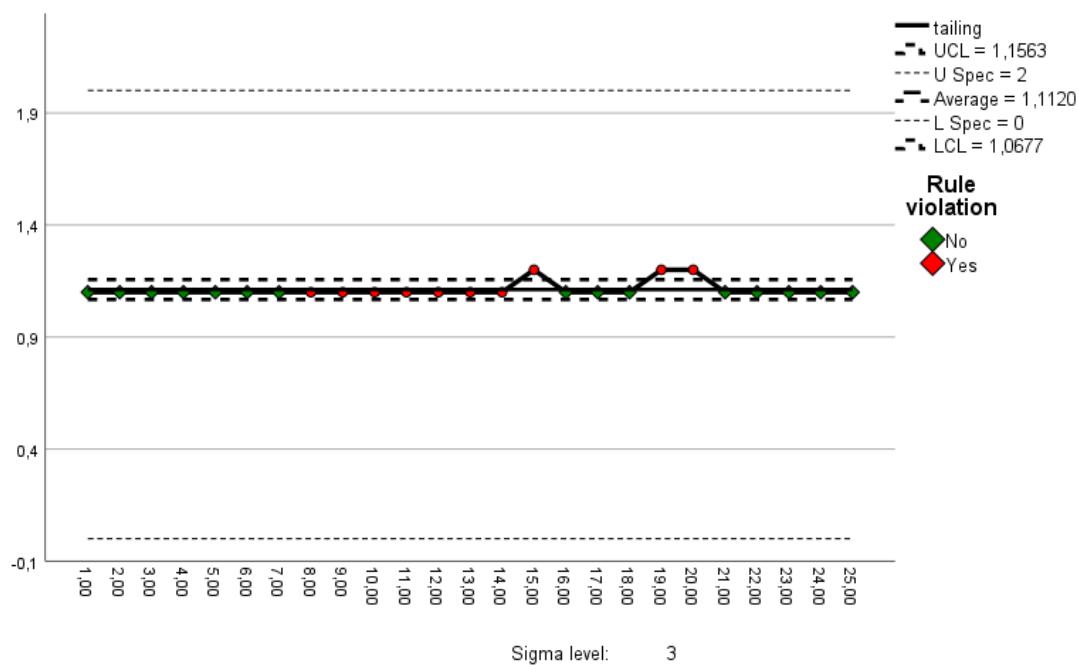

Figure S16 FLP tailing: X-mR control chart - individual values at sigma level of 3

(Points 8,9,10,11,12,13,14: 8 consecutive points below the center line; Points 15,19,20: greater than +3 sigma; Cpk: 17,21 (90%CI 12,49-21,93); PpK: 8,92 (90%CI 6,80-11,05))

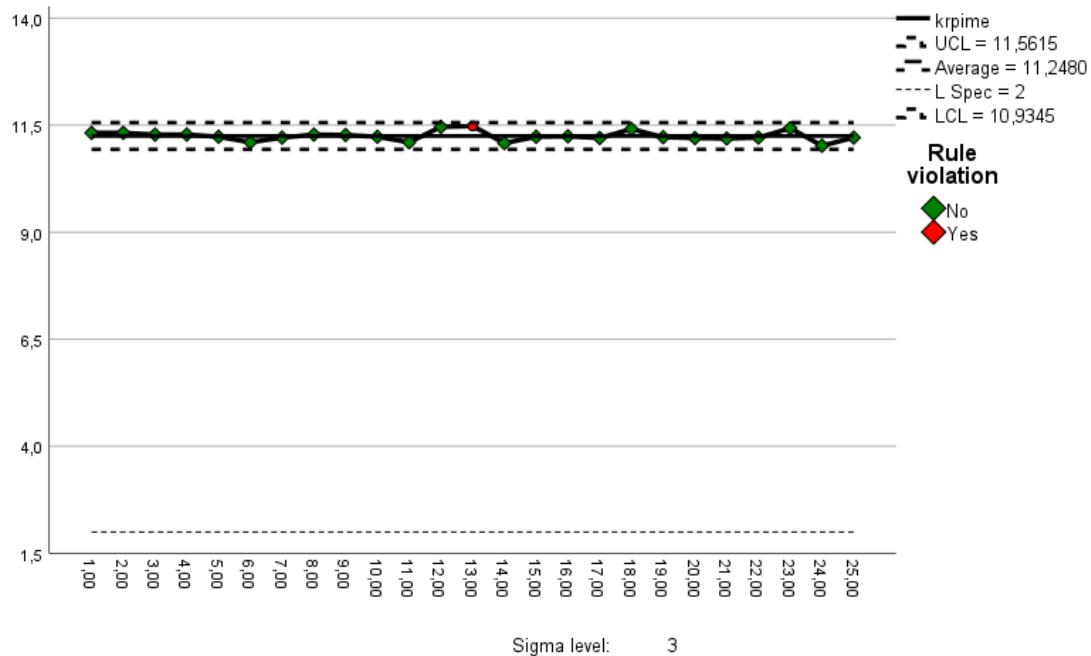

Figure S17 FLP capacity factor: X-mR control chart - individual values at sigma level of 3

(Point 13: 2 points out of the last 3 above +2 sigma; Cpk: 27,79 (90%CI 20,17-35,41); PpK: 27,12 (90%CI 20,68-33,55))

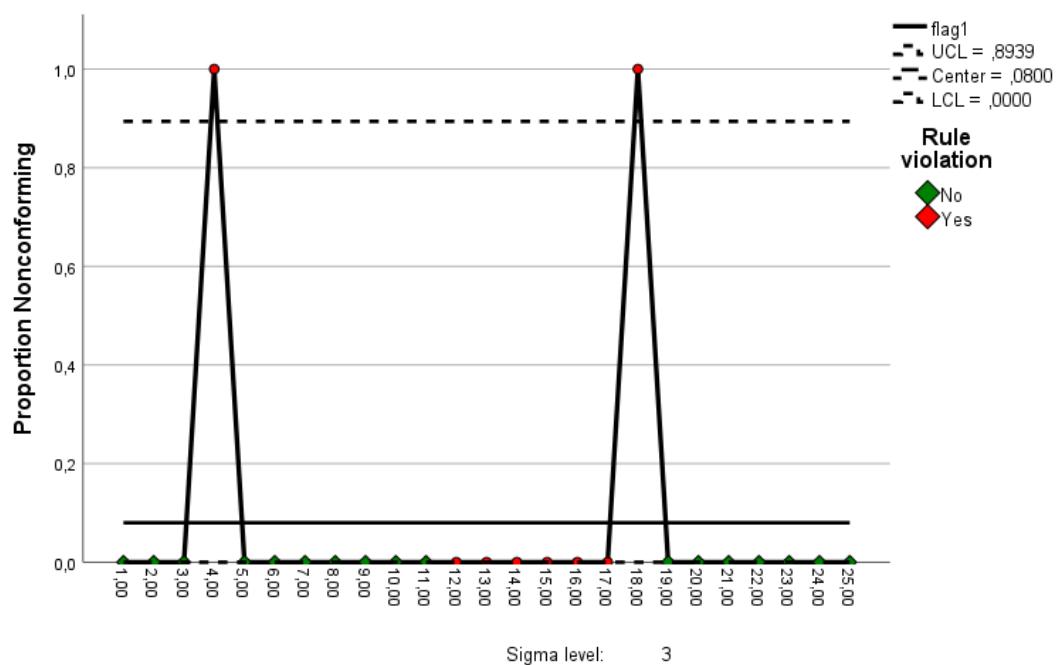

Figure S18 FLP flag: SPchart at sigma level of 3
