Correction: Neumeier et al. The Loneliness of Migraine Scale: A Development and Validation Study. *Clin. Transl. Neurosci.* 2022, 6, 12

Clinical and Translational Neuroscience Editorial Office

MDPI AG, St. Alban-Anlage 66, 4052 Basel, Switzerland; ctn@mdpi.com

The *Clinical and Translational Neuroscience* Editorial Office would like to make the following correction to the Academic Editor listed on this published paper [1]. The originally listed Academic Editor, Prof. Dr. Dominik Straumann, has been removed and replaced by Prof. Dr. Claudio Bassetti.

Following the publication, concerns were brought to the attention of the Editorial Office regarding a potential Conflict of Interest between the authors of this article and the original Academic Editor.

Adhering to our complaint's procedure, an investigation was conducted which confirmed the potential presence of a Conflict of Interest based on the affiliation of the authors and the Academic Editor. As MDPI expects Authors and Academic Editors to disclose all potential interests that may be perceived as inappropriately influencing editorial decisions (as per our policy: https://www.mdpi.com/ethics#_bookmark17), the Editorial Office and the Editorial Board conducted a post-publication review of the article, which included a review of the peer-review process and of the final decision. The result of this review was that the peer-review was judged to be sound and the accept decision was considered to be appropriate. Consequently, the Editorial Office and the Editorial Board have decided that no revision of this article is necessary; however, the listed Academic Editor has been corrected.

The Editorial Office confirms that this change does not affect the scientific results.

This correction was approved by the Editor-in-Chief of *Clinical and Translational Neuroscience*. The original publication has also been updated.
